

MAGSTAR[®]

R A C I N G

Super Inductor Wires FROM TUNERS TO MUSCLE CARS

The MagStar[®] Racing Pro 100 Race Wire is positively the finest performance wire in the world. We have taken our years of experience in manufacturing conductor and extruding ignition wire to produce a wire that will deliver more energy than any other wire while silencing the detrimental effects of Radio Frequency Interface (RFI) and Electromagnetic Interference (EMI).

The MagStar Pro 100 blows away the competition by delivering the hottest spark while at the same time preventing interference with your audio and video equipment.

Super Inductor Wires FROM TUNERS TO MUSCLE CARS

8.5mm PRO 100 Super Inductive Race Wire

The MagStar Racing Wire Sets are designed for a very specific fit. Muscle Cars and Street Rods generally have different wire routing requirements than the original configurations.

The Product

Completely redesigned spark plug connector assemblies. Each assembly is designed to the Original Equipment fit & form, while the MagStar design dramatically improves the function of the assembly.

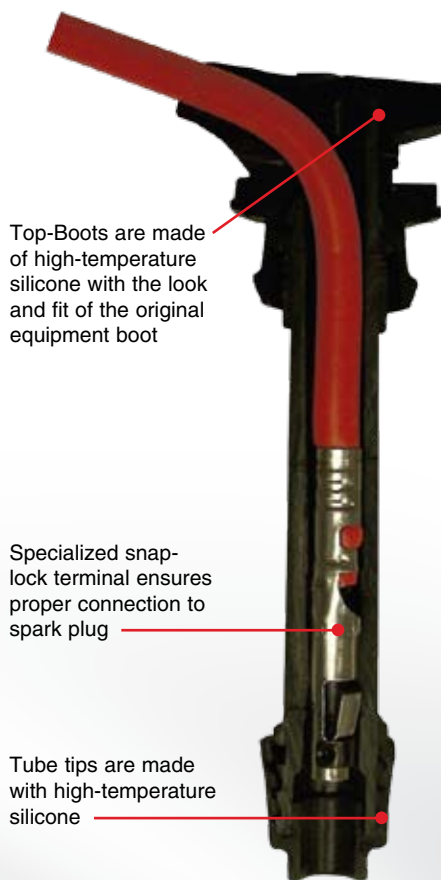

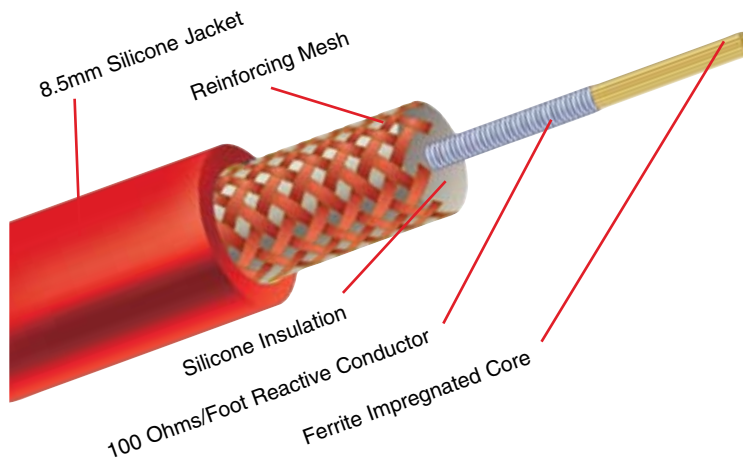

- High-temperature silicone jacket protects to 500°F
- Ultra-low-resistance conductor delivers maximum energy to the spark plug
- Full Power[®] reactive conductor provides the maximum inductance, enhancing the performance of sensitive audio equipment
- Electronics friendly; this wire is ultra "quiet" in protecting on-board computers, laptop tuners and audio/video equipment from RFI and EMI

The Components

The unique stainless steel terminals feature a locking tab that ensures accurate terminal placement as well as greatly increasing terminal retention.

A 5mm wire may be used where required to fit OE clips and guides.

All critical dimensions are designed for an exact fit to the OEM components being replaced.
