

# > POWER FOR THE NEXT GENERATION

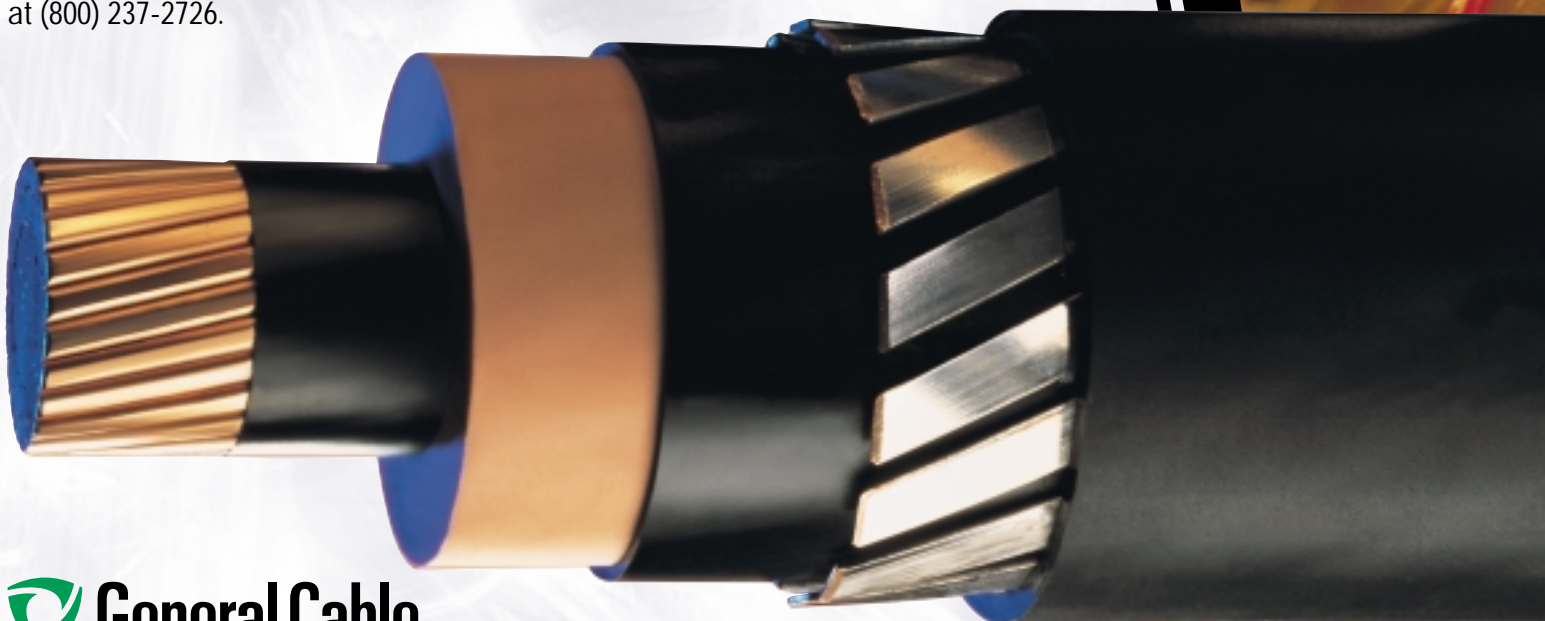

**BICC**<sup>®</sup>  
B R A N D

General Cable has been designing and manufacturing cable systems for over 100 years. As the largest energy product supplier in North America, BICC Brand energy cables are the preferred choice for power generation, transmission and distribution.

- General Cable offers a wide range of cables and sizes to meet utility requirements for the finest cables used in a variety of overhead and underground applications.
- General Cable is the largest producer in North America of high quality medium-voltage cables as well as a leader in material technology.
- Our stand-alone testing facility in Marshall, Texas provides full size cable testing services to support our customers, our research and development, industry organizations, suppliers, and competitors. It boasts the most sophisticated, largest facility of its kind in North America.

As an industry leader in a challenging marketplace, General Cable's Utility Group is strategically positioned to provide the utility market with the best service and the best products available—when and where they are needed. We are focused on providing outstanding quality, service and pricing while driving “value” for our customers.

If you need powerful solutions for the next generation, call General Cable today at (800) 237-2726.
